Molecular Biology Career Driven Track (B.S. to Professional Career) – Early Career Development

FRESHMAN

Explore professional scientific societies and job qualifications, seek advisement from faculty to set career goals.

If you are considering professional school in a pre-health field, consult the Pre-health track for the BIOH major.

SUMMER 1

Summer job or a volunteer position with an allied organization.

SOPHOMORE

Explore research interest through courses and discussions with GCC faculty.

Review career goals.

Discuss appropriate minors for career goals.

Learn more about the GCC Mentor Connect/Alumni Mentoring Program.

SUMMER 2

Internship 1 or summer job in a related field of study.

Volunteer position with an allied organization.

JUNIOR

Join/Volunteer with student or professional organizations.

Determine research interest/question development.

Research at GCC with faculty.

Attend a professional conference.

Attend and network at the GCC Career Fair.

SUMMER 3

Internship 2 or summer job in a related field of study.

Research at GCC with faculty.

SENIOR

Seek positions through the career services office and faculty.

Attend a professional conference and present research.

Write a research manuscript and submit to a peer reviewed journal.

Apply to professional certifications.

Serve as a TA in BIOL or SCIC course.

Attend and network at the GCC Career Fair.

POST-GRAD

You have options to work as, or pursue additional training for Laboratory Tech, High School Teacher, Medical Salesperson, Quality Control Tech, Veterinary Tech, public health careers, and much more.

If employment is not attained, you still have options to help further your career...

Work a temporary or seasonal position at a private business or a county, state, federal, or nonprofit agency.

Continue to identify and apply to full-time positions.

Attend a professional conference.
