Grove City College is a highly ranked, nationally recognized private liberal arts and sciences college that equips students to pursue their unique callings through an academically excellent and Christ-centered learning environment that reflects the creative hand of God.

DEPARTMENT DESCRIPTION
The Department of Chemistry offers a comprehensive, American Chemical Society certified chemistry degree. This provides the student with a strong preparation for graduate studies and/or a career in the chemical industry. Faculty expertise covers all major areas of chemistry. A variety of research experiences are available to students through ongoing faculty research programs. In addition, the department attempts to inculcate in its students an awareness of the beauty and design in nature that reflects the creative hand of God.

MAJORS
Chemistry
Students complete 75 credit hours of chemistry core classes, upper-level electives and major related requirements. Students may choose a concentration in biochemistry, computational modeling, forensic chemistry, physical chemistry, or synthetic chemistry.

Biochemistry
Students complete 74 credit hours of chemistry core classes, a four-course biology core sequence and major related requirements. Students may choose a concentration in health, forensic chemistry or chemical synthesis.

Chemistry Secondary Education Major leading to 7-12 Certification
Students complete 102 credit hours of chemistry core, education core and major related requirements.

Chemistry/General Science Secondary Education Major leading to 7-12 Certification
Students complete 108-109 credit hours of chemistry core, education core and major related requirements.

MINOR
Chemistry
General, Analytical and Organic Chemistry classes and eight additional credits from the chemistry core classes.

SPECIAL DEPARTMENTAL AREAS OF INTEREST
The department has an active American Chemical Society Student Affiliates group.

UNDERGRADUATE RESEARCH OPPORTUNITIES
There are numerous research opportunities for students during the academic year as well as opportunities during the summer. Projects include inorganic synthesis, organic synthesis, water analysis and monitoring, computational studies, protein structure analysis, analytical chemistry and cancer research.

CERTIFICATION
With the correct choice of electives, an American Chemical Society certified degree can be earned.

INTERNSHIPS
Many students have participated in National Science Foundation-Research Experiences for Undergraduates programs at major research universities. Students have also participated in corporate summer internship programs with companies like BASF, PPG, Oakwoods Labs, AdvanSix, Eurofin Labs, Rockland Immunocohemicals, and Entegris.

CAREER AND GRADUATION OPPORTUNITIES
Graduates have obtained employment with industrial companies like PPG, Perkin Elmer, Cargill, Jamestown Coatings, Optical Filters USA and Ohio Lumex and state crime labs in Ohio and Texas. Many are accepted into health-related professional programs including medical school, dental school, pharmacy school, physician assistant and physical therapy programs. Others go on to strong graduate programs at institutions such as Stanford University, Vanderbilt University, Penn State University, University of Pittsburgh, Carnegie Mellon University, University of Wisconsin and Notre Dame University and the Scripps Research Institute.

“After visiting graduate schools and talking to individuals from different schools, I have realized how beneficial it was to come to Grove City College. I have had many valuable opportunities here that one would not get at a larger university or technical school, such as personal interaction with all my professors, the ability to start my own research project which prepared me for graduate school, hands on experience with all the instruments that Grove City has, and a well-rounded liberal arts education.”

– James Alburger ’13
