

## GROVE CITY COLLEGE

### POST-GRADUATION STUDENT SUCCESS RATES

Post-graduation success data is gathered six months after graduation by the Career Services Office through a survey of all graduates for that year.

The post-graduation success rate is based on reported data of graduates and includes those who are employed, pursuing continuing education (e.g., graduate or professional school programs).

*\*Employed includes: full-time/part-time work, fellowships, military, volunteering/service, temp/contract work, freelancing, entrepreneurial endeavors, etc.*

*\*Knowledge rate represents the percentage of graduates we have knowledge of through survey response or other reliable sources.*
